KITCHEN

Community Pentecostal interviewed several contractors and choose Custom Building Systems as their Design-Build Contractor. Preliminary drawings were created and budgetary costs were determined which were within the church's budget. Final drawings were then completed and permits obtained with construction beginning 3 weeks ahead of schedule.

The facility consists of a 4,400 SF fellowship hall which seats 350 comfortably. A stage was constructed for plays which includes two dressing rooms that lead directly onto each side of the stage. The oversized kitchen, although residential, consists of two dishwashers, two 4-burner ranges and commercial grade refrigerator/freezer and ice-maker.
