

EBENEZER BAPTIST CHURCH ROCK HILL, SC

TYPE: NEW SANCTUARY

AREA: 11,215 SF

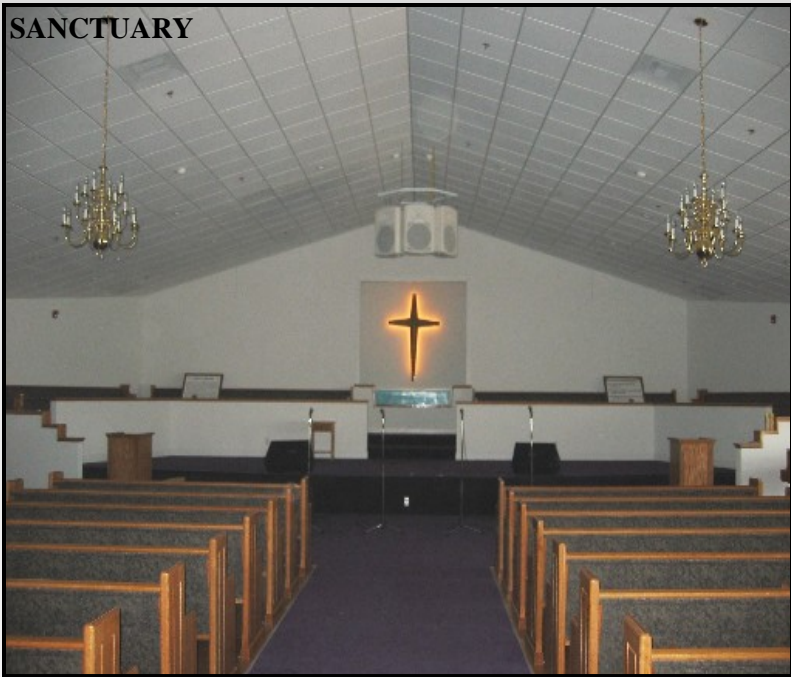

COST: \$815,000

COMPLETION DATE: 2006

FRONT ELEVATION

SANCTUARY

Three years after our initial meeting with Ebenezer Baptist Church, Custom Building Systems was awarded the contract to construct the church's new Sanctuary adjacent to their existing 50+ years old Sanctuary. The church engaged the services of an Architect directly, although as in many cases this church was designed without the church's budget in consideration. Through a detailed cost analysis, CBS was able to offer numerous value engineering options which were very compatible with the churches budget without having to sacrifice quality or space

The Sanctuary consists of a 391 pews seats, two rows of choir seating and elevated pulpit. Details include a lighted cross, dimmable chandeliers and raised sound booth. Other areas include an administrative wing, classrooms, dining area, nurseries and ladies lounge.

The exterior consists of brick veneer with accent banding and dramatic glass front entry system accented with layered stucco details.
